

IS YOUR RIGGING SAFE DEMONSTRATION

DID YOU KNOW?

OH&S Reg. 229 states,
"An employer or contractor shall
ensure that all rigging and
components of rigging are
inspected thoroughly at
appropriate intervals and
visually inspected
before use..."

At the Northern Strands 'Is Your Rigging Safe Demonstration' we will be pulling rigging to destruction on our mobile test bed. We will also provide education on safe lifting practices and proper rigging inspection.

- Do you ever wonder if the rigging you are using is safe?
- Have you ever seen what:
 - overloading can do to the W.L.L.?
 - what cuts and knots can do to the W.L.L.?
 - your working environment can do to the W.L.L.?
- Do you know how your lifting application affects the working load limit?
- Are you familiar with the OH&S regulations for rigging?

DID YOU KNOW?

The working load
limit can vary
between different
types of rigging
hardware?
